NEW SCOOTER PATENT IMPROVES PEOPLES' LIVES

Standing only "PrideR™" enables people with mobility difficulties to "walk"
<https://vimeo.com/141773240>

(Tempe, AZ)...Valley inventor's PrideR™ patent is a revolutionary lightweight electric scooter, especially for people with limited mobility. The PrideR™ brings new hope to millions with medical problems that prevent them from distance walking, to move around or travel. The slow moving, 3-wheel scooter, can also be used for other purposes such as security and leisure.

People with mobility difficulties will most benefit from the PrideR™. It gives those being able to stand and operate a scooter, the gift of pride to **"Stand 'N 'Walk' Proudly™."**

"This is the world's only scooter with a patented Quick-Attachment Mechanism, enabling people to get out of the home and to have a life" said Joseph Tsiyoni, inventor, and CEO of PrideR LLC. The PrideR™ consists of two removable 18-pound parts, which makes it a magical innovation. "No other scooter can be assembled and disassembled as easily and quickly". The disassembly in seconds is due to its innovative structure and unique design.

PrideR LLC found that people who have trouble walking feel self-conscious using wheelchairs. Now they have a new possibility to "walk" anywhere. Among those are millions with respective medical problems, including many of 1.2 Million who undergo Knee and Hip replacements every year.

The PrideR™ is an ultra-nimble, ultra-portable scooter, which provides transportation to people in many industries such as commercial, governmental, tourism and security. It is a safer and more compact alternative to fast moving scooters such as the SegWay.

The quick assembly – disassembly into two parts in seconds makes it easier to load it onto cars, airplanes, busses, or travel anywhere. Its low-cost design makes it affordable to all, especially the elderly. The PrideR™ is easily driven indoors, such as homes and other narrow or crowded places. It can also be used in places the Segway and other scooters are not allowed. (E.g. Segway: Walt Disney's premises).
